Construction Notice

Project: Central Drive, Towamencin

North Penn Water Authority (NPWA) will begin the replacement of approximately 1,630 lineal feet of water main on Central Drive, in between Allentown Road and Columbia Avenue. This project will also include new water main tying into the intersections at York Avenue and Winding Road. This work is set to begin on November 5, 2026.

Project Summary:

This project involves the renewal of 31 water services with copper tubing. The water services will be renewed from the new water main to each property's curb stop located in the utility right of way. The utility right of way is located just beyond the curb in the grass or sidewalk. There will also be one fire hydrant renewed on Central Drive. After water main and service installation follows soil, concrete, and trench restoration.

We anticipate this work to take approximately five weeks to complete, weather-permitting.

Timeline:

November 5, 2026- Mobilization and installation of main will begin.

November 16, 2026- Hydrostatic and bacteriological testing will commence.

November 20, 2026- Water service installation will begin.

Questions:

Please call Angelo Cosentino, NPWA Construction Coordinator, at (610) 721-4851, Monday – Friday between 7:30am and 3:00pm.

NPWA's Water Utility Inspector is Zach Harwanko. He can be reached at (267) 372-8037, Monday – Friday between 7:30am and 3:00pm.

Customer Impact:

In order to ensure the public and workers' safety, the roads will be closed to through traffic during the hours of work. (7:00am-4:00pm)

"No Parking" signs will be placed out the day before, to designate the area of construction for that day. We kindly ask that you have your vehicle moved when your section of street is posted during construction hours. At the end of each workday, the roadway will be open and traversable.

School Buses, emergency vehicles, and residents will have access to their homes but may experience minor delays in some instances. We will make every effort to keep unobstructed access open to local residents to the fullest extent possible.

When it comes time for water service renewals, please make sure to run the **COLD WATER ONLY** when prompted by the inspector. This will ensure any air or discoloration is cleared from your water service. Having access to an available working hose bib will help with this process.

We have notified your local emergency response units to assure they will have access and that your essential services are not interrupted.

For your protection, we have documented property frontage of your curbs, sidewalks, blacktop, lawns, and driveways to ensure that any damage that may be caused, is restored to a condition that is at least equal to the current condition. All concrete, blacktop, or grass areas that are dug up will be fully restored.

We regret any inconvenience that you may experience during this process.
